

### **Three-Five Days Prior to Surgery**

- We encourage you to visit Mission Surgery Center with your completed Pre-Admission Questionnaire for a tour so we may answer any questions you may have.
- Call or schedule a visit with your doctor to ensure you have completed the admission requirements
- Have your pre-surgery laboratory tests, X-rays, or EKG done as ordered by your physician. All tests must be completed prior to the day of surgery. If these tests are performed outside of Mission Hospital, please obtain a business card. During our pre-op telephone call, we will ask you where you had the tests done.
